

2019 Total Vegetation Control (TVC) FLEX Program

Not every TVC site has the same needs. With the TVC FLEX program, applicators can select the best combination of products for each unique location.

Brought to you by BASF Canada Inc., Corteva Agriscience™, Agriculture Division of DowDuPont, and Univar Environmental Sciences.

There are **THREE** WAYS to **SAVE** **\$1,000**

Option 1	Detail™	+	Arsenal® Powerline	Rebate
	3 cases	+	5 cases	\$1,000
Recommended rate: Detail @ 0.435 L/ha + Arsenal Powerline @ 2.34 L/ha				

Option 2	ClearView™	+	Arsenal Powerline	Rebate
	2 cases	+	5 cases	\$1,000
Recommended rate: ClearView™ @ 170 g/ha + Arsenal Powerline @ 2.34 L/ha				

Option 3	ClearView™	+	Torpedo™	Rebate
	2 cases	+	2 cases	\$1,000
Recommended rate: ClearView™ @ 170 g/ha + Torpedo™ @ 500 g/ha				

Please note: all options listed above require the addition of glyphosate to achieve total vegetation control.

Program details:

- Product purchases must be made from Univar Environmental Sciences (UES) between January 1 – August 31, 2019.
- When ordering product from UES, make certain you reference the “TVC FLEX” program to qualify for your rebate. Qualifying products must be ordered together to qualify; certain exceptions may apply.
- Program payments will be administered by UES, who will issue credits to qualifying customers by October 31, 2019. Accounts with credit balances at that time will be eligible for payment via cheque or wire transfer.
- Program payments will not be made on product returns. If product returns are reported after program payments are made, UES reserves the right to deduct associated payment amounts from return credit value. Additional fees may apply.

Questions? Please contact your BASF, Corteva Agriscience™, Agriculture Division of DowDuPont, or Univar Environmental Sciences Representative for more information.
